

ARCHON Industries, Inc.

200 William Street
Port Chester, NY 10573

Washdown Station

For Immediate Release

Thursday, July 25, 2002

Port Chester, NY-ARCHON Industries, Inc. manufacturers and now offers the safest Washdown Station in the Industry. Steam is automatically blocked from flowing through the mixing station using a unique diaphragm device. The diaphragm uses the steam supply pressure to close the steam inlet valve to the mixing chamber. Only after sufficient cold water flow is established will the diaphragm device permit the steam inlet valve to open. **NO WATER-NO STEAM !** ARCHON offers a complete line of Washdown Equipment including steam mixing units, hot and cold water mixing units and detergent mixing units. Available in Stainless Steel and Bronze and with a complete line of accessories.
