TechEng Designs Automates Calculation of Tank Insulation Costs

London, Ontario, Canada – June 11th, 2001 – TechEng Designs launched to-day its latest software application that will eliminate tedious calculations for tank insulation costs. Usually this involves doing many manual calculations. This software program will automatically calculate the surface area, insulation surface area and insulation costs for most tanks including heads. Available now in CD format for Microsoft Windows 98, 2000 and NT 3.51+. Input is in inches with conversions readily available; outputs are in sq.ft., sq.m. and dollars with area conversions calculations readily available. Program saves data by tank number with each head broken-out; and prints a Report with tank data including cost sub-totals and grand total for all tanks. The full Report can also be exported to Microsoft Excel or other similar applications and can be e-mailed direct.. We can modify the software to suit your specific needs!

The Project Manager of the vessel insulating company who requested us to design this program said: "By the way I think the software is fantastic, I've been able to try it out. If we can make those last changes I think it'll be perfect." We incorporated those last changes!

TechEng Designs, a division of Neal Blackburn Management Services, Inc. was incorporated in 1991 and is a technical design company addressing the market niche of technical and engineering software for Windows 95, 98, 2000 and NT 3.51+. Software products include: Tank Capacity Calculations, Stack Gas Emissions Calculations, Flow Calculations for Liquids, Nozzle Diameter Calculations, Tank Surface Area Calculations, Orifice Diameter Calculations, Units 95+ for engineering & environmental conversions and TracTimer (Tracking Your Time). Our products have been purchased by large and small engineering/contractor firms, manufacturing companies, university chemical engineering departments, and individuals in Canada, U.S.A., England, Germany, Belgium, Hong Kong, Israel, Australia and Kuwait. A customer list is shown in our website <http://www.eng-applications.com/>
